With some 450 series models for private and commercial use, Humbaur is one of the leading trailer manufacturers in Europe. Innovative and experienced. Present all over Europe and beyond. As an owner-operated, mid-sized family company, we know what our customers need and how they work. That is why we develop meticulously, manufacture with the greatest care, and test our products down to the core. Innovative ideas, the most up-to-date manufacturing, a clear focus on quality, and expert and extensive support – those are our strengths. Strengths that we use to serve our customers.

*Ulrich Humbaur, Shareholder  
Entrepreneurial Managing Director & CEO*

# HUMBAUR – QUALITY AND EXPERIENCE

## **Many years of experience**

As one of the leading producers of car trailers, and an up-and-coming producer of semi-trailers, we manufacture approximately 50,000 trailers annually. Since the company was founded we have already produced more than 450,000 trailers. In the first quarter of 2010, the 500,000<sup>th</sup> trailer will roll out of the Gersthofen factory.

Each of our trailers is a reflection of the knowledge acquired over decades.

## **A firm commitment to quality**

Robust and long lasting – that's how a trailer must be. That is the reason why we only use high-quality components and ensure first-class workmanship at all times. Before a trailer leaves our factory, highly qualified technicians check each individual detail.

## **Variety and flexibility**

We provide our customers with flexible, multi-purpose transport solutions in the range from 750 kilograms to 40 tonnes gross weight. We consistently offer both private and commercial customers the appropriate transport aids for the most diverse of applications.

## **Wide range of accessories**

In addition to extensive standard equipment, we offer a large selection of accessories to suit every model of trailer. Thus, from various building blocks, each customer can assemble a trailer that is exactly tailored to his individual requirements.

## **Customer service**

You can obtain comprehensive service for trailers up to 3.5 to on site from your dealer. For trailers above 5 to,

our broad spectrum of services also includes direct service. Regardless whether it concerns the supply of spare parts, or simply assistance in the use of your trailer, Humbauro is always at your service.

## **State-of-the-art manufacturing processes**

Quality is in the detail. This means that Humbauro only uses vehicle components from well-known manufacturers. The exchange of experience with our suppliers thus enables the continuous improvement of our products.

## **Made in Germany**

Each of the approximately 450 production models is constantly developed and manufactured to the latest state of the art. In this way we ensure first-class quality with continued performance – quality made in Germany.

### Low loader full-aluminium HA

Model	HA202513	HA203015	HA253015
Internal dimensions in mm	2510 x 1310 x 350	3030 x 1500 x 350	3030 x 1500 x 350
Total permissible weight in kg	2000	2000	2500
Payload in kg	1670	1633	2113
Loading height in mm	530	530	550
Tyres in inches	13	13	15
Overall dimensions in mm	3936 x 1810 x 904	4460 x 2004 x 905	4460 x 2004 x 915

(all specifications are approximate)

The outstanding design and painstaking assembly make the HA a reliable and long-lasting transport aid. Whether to be used for transporting motorcycles, bicycles or garden equipment, the wide choice of accessories permits a wide range of applications. The HA model impresses completely with its multi-functionality.

Optionally with perforated plate attachment, versatile in application

Flap front and rear for easy loading and unloading

Multi-function lighting with integrated triangular rear reflector

# STANDARD EQUIPMENT

## Convincing arguments:

### The HA full aluminium lowloader by Humbaur

- **Chassis:** Frame /upright wall construction made of sturdy, anodised aluminium; hot-dip galvanized drawbars; maintenance-free rubber suspension axles with independent suspension units by renowned manufacturers; High quality branded tyres (suitable up to 100 km/h)

- **Electric system:** Multi-function lighting with integrated triangular rear reflector, side lights; 13-pin connector and reversing lights
- **Body:** 15 mm thick special water-resistant wooden floor, glue-laminated several times, with non-slip phenolic resin covering; integrated flush-fitting locks; push-fit possible at all four corners; four lashing eyes on the 350 mm tall side walls; front and rear flaps

The trailer for daily professional use. Two different loading heights can be selected for this model of trailer as standard. The HN with its low centre of gravity for particularly rugged applications, such as, for example, loads that need a low loading height, or the HT with its higher load height, which is characterised by its increased ground clearance, ideal for rough building site use.

Lashing brackets integrated in the exterior frame as standard

Corner stanchion pockets and corner stanchions removable, with special ACC coating

Anodised aluminium side walls, 300 mm or 350 mm high

# STANDARD EQUIPMENT

## Convincing arguments: The HN aluminium highloader by Humba

- **Chassis:** frame and chassis hot-dip galvanized; Frame components (longitudinal beam, exterior frame, rear plate and underride guard) with low structural height, hot-dip galvanized, joined by bolting and riveting – so

that they are easily replaced in the event of damage; maintenance-free rubber suspension axles with independent suspension units by renowned manufacturers; High quality branded tyres (suitable up to 100 km/h)

- **Electric system:** Multi-function lighting with integrated triangular reflector, side lights and peripheral lighting (2100 mm body width and above); 13-pin connector and reversing lights

- **Body:** 18 mm thick special water-resistant wooden floor, glue-laminated several times, with non-slip phenolic resin covering; body internal dimensions matched to Euro pallet dimensions as standard; removable side walls made of anodised double-walled aluminium profile; lashing brackets integrated directly in the external frame; removable corner stanchions and stanchion pockets with Special ACC coating\* (see p. 55)

Tip angle (rear)	41°	41°

(all specifications are approximate)

The LOADY, the "small" rear tipper impresses with its compact dimensions and high quality material selection. This makes it an indispensable aid for daily use. Just like its bigger brothers, the GARANT and the HTK, the LOADY is now equipped with a hot-dip galvanized single-piece steel body. This gives the LOADY a quality advantage which is not available with any other product on the market.

Approx. 620 mm high mesh steel extension. hot-dip galvanized, available as an option

4 lashing rings fitted to the body

Hard-chromed 2-stage tipping cylinders

# STANDARD EQUIPMENT

## Convincing arguments: The rear-tipping **LOADY** by Humbaur

- **Chassis:** Chassis and steel plate body (floor in a single piece) hot-dip galvanized; frame structure made of welded, riveted and bolted sectional beams; excellent longitudinal stability from a combination of V draw-bar and longitudinal beam; maintenance-free rubber

suspension axles with independent suspension units by renowned manufacturers; High quality branded tyres (suitable up to 100 km/h)

- **Electric system:** Multi-function lighting with integrated triangular rear reflector 13-pin connector and reversing lights
- **Body:** hard-chromed 2-stage quality tipping cylinders and high quality hydraulic unit; Hand pump, optional electric hydraulic pump; 4 lashing rings fitted to the

body; side walls made of anodised aluminium, 300 mm tall, completely removable; low loading height of 630 mm; removable corner stanchions and stanchion pockets with special ACC coating\* (see p. 55)

(all specifications are approximate)

The unique quality GARANT rear/3-way tipper by Humbaur is fitted entirely with hot-dip galvanized components. The floor of the tipping body, which is manufactured in one piece, is a unique feature. An existing plank chute means that the GARANT can easily be retro-fitted with access planks. This means that the Garant can also be used for transporting smaller construction machines or similar equipment. As a result of its compact size and outstanding quality, the GARANT is an indispensable aid for all landscapers and gardeners, as well as for the building trade.

Tipping body floor made of sheet steel in a single piece

Plank chute and mountings fitted as standard, planks available as an option

Optional aluminium planks inserted under the loading area

# STANDARD EQUIPMENT

## Convincing arguments:

### The GARANT rear/3-way tipper by Humbaar

- **Chassis:** Chassis, frame and tipping body (floor in a single piece) hot-dip galvanized; frame structure made of welded and bolted sectional beams; maintenance-free rubber suspension axles with independent suspension units by renowned manufacturers; High quality branded tyres (suitable up to 100 km/h)

- **Electric system:** Multi-function lighting with integrated triangular rear reflector, side lights; 13-pin connector and reversing lights
- **Body:** Plank chute and mountings as standard, access planks optionally retro-fittable; hard-chromed 3-stage quality tipping cylinders and high quality hydraulic unit; Hand pump, optional electric hydraulic pump; 4 lashing rings fitted to the body; Side walls made of galvanized and powder-coated steel, clinched in the jointing process - extreme resistance to outwards pressure;

alu version with anodised aluminium side walls, rear flap can be swung; removable corner stanchions and stanchion pockets with special ACC coating\* (see p. 55)

The qualitatively unique 3-way tipper by Humber is fitted with a combined electric pump and hand pump on all models over 3000 kg overall weight, which are operated using an oil circulation system. This permits simple and independent operation in all applications.

Pank chute integrated in the chassis, 4-stage tipping cylinders

Side walls made of galvanized and powder-coated steel

Over 3000 kg overall weight, electric and hand pumps fitted as standard

# STANDARD EQUIPMENT

## Convincing arguments: The HTK steel 3-way tipper by Humba

- **Chassis:** Chassis, frame and tipping body (floor in a single piece) hot-dip galvanized; frame structure made of welded and bolted sectional beams; maintenance-free rubber suspension axles with independent suspension units by renowned manufacturers; High quality branded tyres (suitable up to 100 km/h)
- **Electric system:** Multi-function lighting with integrated triangular rear reflector, side lights; 13-pin connector and reversing lights

- **Body:** Plank chute and mountings as standard, access planks optionally retro-fittable; hard-chromed 4-stage quality tipping cylinders and high quality hydraulic unit; Hand pump over 3000 kg overall weight with combined electric and hand pump; 4 or 6 lashing rings fitted to the body, side walls galvanized and powder-coated steel, clinched in the joining process – extremely resistant to outward pressure, completely removable, rear flap removable; removable corner stanchions and stanchion pockets with special ACC coating\* (see p. 55)

(all specifications are approximate)

The HS series is specifically designed for the everyday transport of light to medium-heavy constructional machines or diggers. The highlight is the extremely solid construction. In combination with the very low loading height this means that there is no obstacle to easy loading. The steel mudguards covered with aluminium chequer plate that can be stood on, and a lighting unit integrated in a protective metal casing, complete the picture.

Steel access rails with integrated support foot

Optional body with tarpaulin frame and tarpaulins

Hot-dip galvanized steel mudguards covered with aluminium chequer plate, that can be stood on

# STANDARD EQUIPMENT

## Convincing arguments: The HS tandem-axle trailer by Humbaur

- **Chassis:** self-supporting bolted frame/side wall construction made of 3 mm thick sheet steel to meet the highest of demands; all vehicle components hot-dip galvanized
- **Electric system:** Multi-function lighting with integrated triangular reflector in a metal protective casing, side lights and peripheral lights; 13-pin connector and reversing lights
- **Body:** 18 mm thick special water-resistant wooden floor, glue-laminated several times, with non-slip phenolic resin covering; Lashing rings integrated in the floor frame section – 8 in number (for the 3000 mm internal length version) or 10 in number (for the 3750 mm internal length version); solid steel access planks mounted on a solid steel shaft, adjustable over the full width of the trailer, and with integrated adjustable support feet; very low loading height of 460 to 490 mm; hot-dip galvanized steel mudguards covered with aluminium chequer plate that can be stood on

### ALLCOMFORT tilting wheels-in trailer

Model	ALLCOMFORT 3000	ALLCOMFORT 3500
Box dimensions in mm	4300 x 2100 x 200	4300 x 2100 x 200
Total permissible weight in kg	3000	3500
Payload in kg	2060	2530
Loading height in mm	650	665
Tyres in inches	13	13
Overall dimensions in mm	5994 x 2254 x 1570	5981 x 2254 x 1600
Access angle	11°	12°

(all specifications are approximate)

The ALLCOMFORT is a universal transporter with hydraulic tilting body for Multi-function applications. The combination of the tilting body with the drive-over wall produces an excellent access angle which permits easy loading even of lower-sitting machines and automobiles. The ALLCOMFORT has four removable corner stanchions which can optionally carry a tarpaulin frame with tarpaulins to ensure weather-independent transport.

Body with special tipping bearing which is coupled directly with the two axles

Perforated drive-over strip folded up with gas-spring support

Optionally with rope winch, pull-rope and diverting roller

# STANDARD EQUIPMENT

## Convincing arguments:

### The ALLCOMFORT tilting wheels-in trailer by Humbaur

- **Chassis:** Frame and chassis made from hot-dip galvanized special steel sections, bolted and riveted together for optimum corrosion protection; very low loading height as a result of the frame construction in conjunction with the special 13 inch tyres; secure and rapid-acting braking as a result of the four-wheel braking system with integrated automatic reversing facility;

unique tipping bearing forms a rigid connection between the body and the axles for optimum load carrying and quiet running

- **Electric system:** Multi-function lighting with integrated triangular reflector, side lights and peripheral lights 13-pin connector and reversing lights
- **Body:** Double-acting tipping cylinder (for lifting and lowering) the body; 900 mm high drive-over wall, hot-dip galvanized with gas spring support; very large floor plate, in one piece and protected against water penetration with multiple water-resistant glue-lamina-

ted wood, 18 mm thick with non-slip phenolic resin covering; 4 pairs of integrated lashing brackets for load securing in the outer frame sections (system can be extended); completely removable 200 mm high side wall at the sides and at the front, made of anodised aluminium, with tension locks; Rope winch as standard, optionally available with rope winch, pull rope and diverting roller

Access angle	6°	5°	5°	5°	

(all specifications are approximate)

The Senko impresses with its consistent, solid construction and minimum access angle. It masters the transport of machines which are extremely low to the ground. The hydraulically lowering axles ensure that the loading area can be lowered almost to ground level. A drive-over wedge made of aluminium on the access flap ensures easy loading and unloading. The Senko, the trailer for tricky transport tasks.

Sturdy aluminium mudguards fold up automatically when lowering

Electric pump with electro-hydraulic control unit combined with a hand pump (optional)

Access flap made of wood and drive-over wedge made of aluminium

# STANDARD EQUIPMENT

## Convincing arguments: The SENKO lowering trailer by Humbaur

- **Chassis:** chassis, frame and supports hot-dip galvanized; frame construction made of welded and bolted sectional beams; hydraulically lowering rubber suspension axles with independent suspension from renowned manufacturers; High quality branded tyres (suitable up to 100 km/h)

- **Electric system:** Multi-function lighting with integrated triangular reflector, side lights and peripheral lights; 13-pin connector and reversing lights
- **Body:** 18 mm thick special water-resistant wooden floor, glue-laminated several times, with non-slip phenolic resin covering; hydraulic unit with hand pump, optional electric pump with electro-hydraulic control unit; automatically opening and closing mudguards made of aluminium chequer plate; side and front walls made of anodised double-wall aluminium sections;

rear access flap made of multi-glue-laminated water-resistant special wood; side to be driven on also covered with aluminium chequer plate, 4 hinges made of hot-dip galvanized steel; a drive-over wedge made of aluminium on the access flap top end ensures easy loading and unloading

The SERIES 2000/3000/3500/8000/8200/8400 offer you a very wide selection of accessories. Equip your vehicle transport trailer exactly in accordance with your wishes. You can rely completely on our high quality standards.

## Body:

- Cover net
- AKS safety coupling
  - aluminium planks 1.9 to capacity, length 2465 mm
- aluminium planks 2.3 to capacity, length 2230 mm
- aluminium planks 2.8 to capacity, length 2650 mm
- aluminium perforated plate cover anodised 600 mm
- aluminium plug-in wall 900 mm long, between the planks
- aluminium plug-in wall 1230 mm long, between the planks
- outrigger rods for rear flap, loose (2 pieces)
- digger bucket rest for V drawbar
- tyres, 13" instead of 10"
- floor plate covered in aluminium chequer plate
- side wall 350 mm (fitted)
- side wall extension 350 mm, 2-part
- side wall extension 350 mm
- side wall extension steel, 350 mm rear swinging
- shackle lock
- Safety Compact theft prevention
- DIN towing eye for HV drawbar, 2000 kg–2500 kg
- DIN towing eye for HV drawbar, 3000 kg–3500 kg
- spare wheel
- spare wheel holder (loose)
- spare wheel holder (fitted)
- spare wheel holder mounted on drawbar
  - (only possible with longer drawbars)

- flat tarpaulin
- flat tarpaulin for side wall frame
- flat tarpaulin version without railing
- flat tarpaulin version with side railing
  - (including railing front + rear)
- H frame
- height adjustable drawbar (ball head coupling and DIN towing eye not included)
- wood-aluminium cover for basic side wall (loose)
- wood-aluminium cover for basic side wall (fitted)
- combined operation of hand and electric pump
- ball head coupling for HV drawbar, 2000 kg–2500 kg
- ball head coupling for HV drawbar, 3000 kg–3500 kg
- long drawbar
- metal locking boot with lock
- middle stanchions
- tarpaulins & frame, loading height 1300 mm
- tarpaulins & frame, loading height 1600 mm
- tarpaulins & frame, loading height 1800 mm
- tarpaulins & frame, loading height 2000 mm
- wheel shock absorber 3.5 t (loose)
- wheel shock absorber (fitted)
- side railing
- front and rear railing
- railing on wood-aluminium cover
- drop stands (2 pieces)

Wheel shock-absorbers  
(for 100 km/h approval)

- rope winch with pull-rope and diverting roller
- mesh steel extension 620 mm
- steel drive-over wall
- jockey wheel
- telescopic crank supports (2 pieces)

## Lighting/Electric system

- 13 pin plug
- adapter 7-13 pin
- electric pump for lifting and lowering
- Rear facing headlamps (only possible with 13-way plug)

## Load securing

- lashing bracket
- lashing rings flush-mounted in wooden floor,
  - pull force each 0.2 t (4 pieces)
- lashing rings flush-mounted in wooden floor,
  - pull force each 0.4 t (4 pieces)
- lashing rings flush-mounted in wooden floor,
  - pull force each 0.4 t (6 pieces)
- bicycle mounting rail with locking bracket (1 pieces)
- folding rings (4 pieces)
- cross beam for bicycle mounting rail, width 1310 mm
  - (2 pcs.), only in combination with a wood-aluminium cover!
- cross beam for bicycle mounting rail, width 1500 mm
  - (2 pcs.), only in combination with a wood-aluminium cover!

#### **\*ACC (AUTOPHORETIC COATING CHEMICALS)**

This is a modern corrosion protection for all steel and cast components. In our case, all corner stanchions and stanchion pockets are ACC coated. Pretreating with with spray and dip degreasing and chemical, current-free stripping achieves very good resistance to friction or mechanical influences. In addition, this ensures 100% internal coating and a very high edge protection of the corner stanchions and stanchion pockets. Well-known manufacturers in the automobile industry also use this process.

Please note that the illustrated colours can differ from the original colours.

## SERIES 2000 / 3000 / 3500 / 8000 / 8200 / 8400

cover net

AKS safety coupling

Aluminium planks  
- 1.9 t capacity, length 2465 mm  
- 2.3 t capacity, length 2230 mm  
- 2.8 t capacity, length 2650 mm

aluminium perforated plate  
cover anodised 600 mm

Aluminium plug-in wall 980  
and 1230 mm long, between  
the planks

outrigger rods for rear flap,  
loose (2 pieces)

digger bucket rest for V drawbar

tyres, 13" instead of 10"

floor plate covered in aluminium  
chequer plate

side wall 350 mm (fitted)

side wall extension 350 mm

side wall extension 350 mm,  
2-part

side wall extension steel, 350  
mm rear swinging

shackle lock

Safety Compact theft prevention

DIN towing eye for HV drawbar,  
2000 kg–2500 kg,  
2000 kg–2500 kg and  
3000 kg–3500 kg

spare wheel

spare wheel holder (loose)

spare wheel holder (fitted)

spare wheel holder mounted  
on drawbar (only possible with  
longer drawbars)

## SERIES 2000 / 3000 / 3500 / 8000 / 8200 / 8400

flat tarpaulin

flat tarpaulin for side wall frame

flat tarpaulin version without railing

flat tarpaulin version with railing at the side (including railing front + rear)

H frame

height adjustable drawbar (ball head coupling and DIN towing eye not included)

wood-aluminium cover for basic side wall (loose)

wood-aluminium cover for basic side wall (fitted)

combined operation of hand and electric pump

ball head coupling for HV drawbar, 2000 kg–2500 kg and 3000 kg–3500 kg

long drawbar

metal locking boot with lock

middle stanchions

tarpaulin & frame, loading height 1300mm, 1600mm, 1800mm and 2000 mm

wheel shock absorber 3.5 to (loose)

wheel shock absorber (fitted)

side railing

front and rear railing

railing on wood-aluminium cover

drop stands (2 pieces)

## SERIES 2000 / 3000 / 3500 / 8000 / 8200 / 8400

rope winch with pull-rope and diverting roller

mesh steel extension 620 mm

steel drive-over wall  
(design depending on model)

Jockey wheel

telescopic crank supports (2 pieces)

13 pin plug (standard)

adapter 7-13 pin

electric pump for lifting and lowering

rear-facing headlights (only possible with 13 pin plug)

lashing bracket (including bolts)

lashing rings flush-mounted in wooden floor, pull force each 0.2 to (4 pieces)

lashing rings flush-mounted in wooden floor, pull force each 0.4 to (4 or 6 pieces)

bicycle mounting rail with locking bracket (1 pieces)

folding rings (4 pieces)
